

## WORK APRONS

As the German market leader and one of the leading manufacturers worldwide, as inventors of the classic butcher apron and as inventors of the TPU apron, we are particularly motivated to search for innovative solutions and practical new products in the work apron area and implement them in our production. Our classics (and of course customised orders) are made in a wide variety of materials and material strengths, often in several colours and with a range of closure systems.

The globally recognised SGS INSTITUT FRESENIUS has

tested our aprons for us and pronounced them good. The rubber aprons were even awarded the LFGB certificate. We are always searching, literally on a daily basis, for innovative and intelligent solutions, in order not only to fulfill but also to be ahead of increasingly restrictive hygiene and safety requirements.

Aprons from the inventor of the Butcher apron – the Original made by SCHLACHTHAUSFREUND.

Our apron icons will help you see which aprons are best suited to which industry:

BAKING AND CONFECTIONERY INDUSTRY

AGRICULTURAL INDUSTRY
